GC-coil线圈式加热器

GC-coil coil heaters

GC-coil线圈式加热器有各种截面和尺寸可供使用，在最紧密的安装空间内提供高性能的电加热，筒形外壳上最高温度可达750°C。最小弯曲半径从R3到R13（取决于截面），这使得GC-coil线圈式加热器的使用不仅是直线或盘绕形的，而且可以是几乎任何几何形状。一体的热电偶（选项）实现精确的温度控制。在喷嘴加热上，GC-coil通过将单个线圈按梯度进行特殊设计获得独立的功率分配。

所有的GC-coil线圈式加热器有各种出头和连接形式可供使用，以适合各种应用。

GC-coil coil heaters are available in various cross sections and sizes and offer high-capacity electrical heating in the tightest of installation spaces at temperatures of up to 750°C on the cartridge sheath. The minimum bending radius of R3 to R13 (depending on the cross section) allows the use of the GC-coil coil heaters not only in straight or coiled form, but in almost every geometrical shape. An optionally integrated thermocouple enables precise temperature control. In nozzle heating, the GC-coil achieves individual power distribution through the specifically designed gradient of the individual windings.

All GC-coil coil heaters are available with various exits and connections to suit the respective application.

技术可能性和选项

Technical possibilities and options

- 紧凑空间中发挥高性能
High performance in compact spaces
- 一体的热电偶
Integrated thermocouple
- 按客户要求几乎可盘成或弯成任何几何形状
Winding or bending according to customer's wishes in nearly every geometrical form
- 各种出头和连接形式
Various connections and exits
- 由于有GC-jacket，它们具有最佳的热传递。
